MY SUPER-CLEVER AND REALLY INTERESTING TITLE

SOME ASTROPHYSICS STUDENT[1]

[1]Department of Physics and Astronomy and possibly the National Superconducting Cyclotron Laboratory, Michigan State University, East Lansing, MI 48824, USA student@msu.edu
Draft version March 16, 2017

ABSTRACT

This is my abstract, full of abstracty goodness.

Keywords: coffee: science: awesomeness

1. INTRODUCTION

Intro here! You can use two different formats of citations. Press & Schechter (1974) refers to references one way. (Press & Schechter 1974) does it another.

2. METHODS

Methods here! Kitten can be found in Figure 1. You can put hyperlinks in LaTeXpapers using the hyperref package.

3. RESULTS

Results here! You can use color macros to change the color of text to make a point or remind yourself to do something later. Just remember to remove it at some point, because it's actually pretty annoying when people think that it's a URL or a citation.

4. DISCUSSION

Discussion here!

5. ACKNOWLEDGMENTS

This is where you put in a long, flowery acknowledgment to thank all the people who deserve it, and some who don't but would be upset if you didn't acknowledge them.

REFERENCES

Press, W. H., & Schechter, P. 1974, ApJ, 187, 425

Figure 1. A kitten. There are many ways to mess with figure placement using the appropriate commands. Note that this is a huge time sink.
