Pre-class assignment #17

PHY-905-005
Computational Astrophysics and Astrostatistics
Spring 2023

This assignment is due the evening of Wednesday April 5, 2023. Turn in all materials via GitHub.

Reading:

1. Chapter 7 (pp. 150-189) of *Modern Statistical Methods for Astronomy*, by Feigelson & Babu

Your assignment:

1. Work through the tasks in the included IPython notebook!

2. In the file `ANSWERS.md`, write down any questions that you have about the material you read in Chapter 7 or the work you did in the IPython notebook discussed above, any points that are not clear, or anything you'd like to know more about. Aim for at least 3 questions/unclear points/etc.

Handing it in: Include your modified code and your answers to the questions (in the file `ANSWERS.md`) in your assignment.
